

BASED ON VPAT® 2.5 · WCAG 2.2 EDITION

The VPAT

Template & Guide,

ready to fill in

A blank Voluntary Product Accessibility Template with a plain-English guide to completing it honestly into an Accessibility Conformance Report (ACR), with the full WCAG 2.2 Level A and AA report tables procurement teams expect.

How to use this template

A **VPAT** (Voluntary Product Accessibility Template) is the standard form, published by the Information Technology Industry Council (ITI), for documenting how a digital product meets accessibility requirements. Once you fill it in, the completed document is called an **Accessibility Conformance Report (ACR)** — that is what a buyer asks for during procurement.

Replace every dotted line and fill every “Conformance Level” and “Remarks” cell. Be honest: an ACR built on a real evaluation builds trust; an inflated one is quickly exposed. If you have not properly evaluated a criterion, say so. The last chapter explains how to finish.

This is guidance to help you prepare a VPAT/ACR, not legal advice. “VPAT” is a registered trademark of ITI. © 2026 EAA Navigator. eaa-navigator.com

00

VPAT, ACR & how it's read

What it is, who asks for it, and the words it uses

The document procurement asks for *in brief*

If you sell software, a website, an app or a document to a government body or a large enterprise — especially in the United States — you will be asked for a VPAT. It is how buyers compare the accessibility of competing products before they purchase. A credible ACR can win deals; a missing or dishonest one can lose them.

VPAT VS ACR

The **VPAT** is the blank template. When you complete it for your product, the result is an **Accessibility Conformance Report (ACR)**. People use both terms loosely, but that is the distinction.

The four editions

The VPAT comes in four editions, depending on which standard the buyer cares about. This template contains the **WCAG edition** tables (the most widely requested). If you need the others, see chapter 04.

VPAT WCAG

Reports against WCAG 2.0 / 2.1 / 2.2 (ISO/IEC 40500).

VPAT 508

Reports against the Revised U.S. Section 508 standards.

VPAT EU

Reports against EN 301 549 — the European standard behind the EAA.

VPAT INT

International edition combining all of the above.

The conformance terms

Every criterion is rated with one of these terms in the “Conformance Level” column. Use them exactly as defined — buyers read them literally.

Supports

The functionality meets the criterion without known defects, or with equivalent facilitation.

Partially Supports

Some functionality does not meet the criterion.

Does Not Support

The majority of the functionality does not meet the criterion.

Not Applicable

The criterion is not relevant to the product.

Not Evaluated

The criterion has not been evaluated. Permitted only for Level AAA criteria.

BEFORE YOU START

An ACR is only as good as the evaluation behind it

Automated tools find only about 30–40% of WCAG issues, so an honest ACR needs human and assistive-technology testing behind every “Supports”. If you are filling this in from a scanner result alone, treat the result as provisional — and consider a manual audit before you put your name to it.

01

Product & evaluation info

The cover details every ACR needs

Product and report details *fill these in*

These details sit at the top of your ACR so a reader knows exactly what was evaluated, when, by whom, and against which standards.

NOTES

EVALUATION METHODS USED

Under “Evaluation methods used”, name the tools and assistive technologies you tested with (e.g. axe DevTools, manual keyboard testing, NVDA and VoiceOver) and the page templates or components covered.

Applicable standards and guidelines

State which standards your report covers. For the WCAG edition, mark the WCAG row “Included”.

Standard / Guideline	Included In Report
Web Content Accessibility Guidelines 2.2, Level A	
Web Content Accessibility Guidelines 2.2, Level AA	
Revised Section 508 standards (U.S.)	
EN 301 549 (European Union)	

Tip: most buyers want Level A and AA. Level AAA is optional and rarely required across a whole product — only include it if a buyer specifically asks.

02

WCAG 2.2 — Level A

The 31 Level A success criteria

WCAG 2.2 Report — Table 1: Level A 31 criteria

For each criterion, enter a conformance term in the middle column and explain it in the third. “Remarks” is where you describe what works, what doesn’t, and any equivalent facilitation.

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content		
1.2.1 Audio-only and Video-only (Prerecorded)		
1.2.2 Captions (Prerecorded)		
1.2.3 Audio Description or Media Alternative (Prerecorded)		
1.3.1 Info and Relationships		
1.3.2 Meaningful Sequence		
1.3.3 Sensory Characteristics		
1.4.1 Use of Color		
1.4.2 Audio Control		
2.1.1 Keyboard		
2.1.2 No Keyboard Trap		
2.1.4 Character Key Shortcuts		
2.2.1 Timing Adjustable		
2.2.2 Pause, Stop, Hide		
2.3.1 Three Flashes or Below Threshold		
2.4.1 Bypass Blocks		
2.4.2 Page Titled		
2.4.3 Focus Order		
2.4.4 Link Purpose (In Context)		
2.5.1 Pointer Gestures		

Criteria	Conformance Level	Remarks and Explanations
2.5.2 Pointer Cancellation		
2.5.3 Label in Name		
2.5.4 Motion Actuation		
3.1.1 Language of Page		
3.2.1 On Focus		
3.2.2 On Input		
3.2.6 Consistent Help (new in 2.2)		
3.3.1 Error Identification		
3.3.2 Labels or Instructions		
3.3.7 Redundant Entry (new in 2.2)		
4.1.2 Name, Role, Value		

03

WCAG 2.2 — Level AA

The 24 Level AA success criteria

WCAG 2.2 Report — Table 2: Level AA 24 criteria

Level AA is the conformance target the EAA, the ADA Title II rule and Section 508 expect. Complete every row; AA conformance also requires every Level A criterion in Table 1.

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live)		
1.2.5 Audio Description (Prerecorded)		
1.3.4 Orientation		
1.3.5 Identify Input Purpose		
1.4.3 Contrast (Minimum)		
1.4.4 Resize Text		
1.4.5 Images of Text		
1.4.10 Reflow		
1.4.11 Non-text Contrast		
1.4.12 Text Spacing		
1.4.13 Content on Hover or Focus		
2.4.5 Multiple Ways		
2.4.6 Headings and Labels		
2.4.7 Focus Visible		
2.4.11 Focus Not Obscured (Minimum) (new in 2.2)		
2.5.7 Dragging Movements (new in 2.2)		
2.5.8 Target Size (Minimum) (new in 2.2)		
3.1.2 Language of Parts		
3.2.3 Consistent Navigation		
3.2.4 Consistent Identification		
3.3.3 Error Suggestion		

Criteria	Conformance Level	Remarks and Explanations
3.3.4 Error Prevention (Legal, Financial, Data)		
3.3.8 Accessible Authentication (Minimum) (new in 2.2)		
4.1.3 Status Messages

508, EN 301 549 & more

When the WCAG tables aren't enough

Beyond the WCAG tables *the other editions*

The WCAG tables above satisfy most web and mobile requests. But the Revised Section 508 and EN 301 549 editions add further chapters because they also cover hardware, software, documents and support services — not just web content.

WHAT THE OTHER EDITIONS ADD

Both the 508 and EU editions reuse the WCAG report tables above, then add chapters such as: functional performance statements, hardware, software, documentation and support services, and (for EN 301 549) requirements specific to the European standard. If a buyer requests the 508 or EU edition, complete the WCAG tables here first, then add those chapters.

Which edition to send

US web / app buyer	WCAG edition is usually enough; Section 508 edition if they cite 508.
US federal procurement	Revised Section 508 edition.
EU / EAA buyer	EU edition (EN 301 549). The WCAG tables form its core.
Selling to both	INT edition — covers WCAG, 508 and EN 301 549 in one report.

The official blank editions are published by ITI at itic.org/policy/accessibility/vpat. This template gives you the WCAG core that every edition shares.

05

Finish your ACR

Completing it honestly, and what comes next

From template to a report you can stand behind *the last mile*

A VPAT is a statement of fact about your product. Buyers — and increasingly regulators — expect it to be accurate.

A QUICK QUALITY CHECK BEFORE YOU SEND

Have you tested each “Supports” claim with a keyboard and a screen reader, not just a scanner? Are “Partially Supports” rows explained honestly in Remarks, with the limitation and any workaround? Is the report dated, versioned and tied to a specific product version? Did a person who understands WCAG review it?

Be honest — it’s the safer choice

In 2025 the U.S. Federal Trade Commission finalised a one-million-dollar order against an accessibility-overlay vendor for claiming its tool could make any site conformant. The same logic applies to an ACR: overstating conformance is a risk, not a shortcut. An honest “Partially Supports” with a clear remark reads better to a serious buyer than an unsupported “Supports”.

NEED A DEFENSIBLE REPORT?

We can audit, then help you complete the VPAT

If a deal or a deadline depends on your ACR, a manual audit gives you the evidence behind every row — tested with a keyboard and screen reader, mapped to each criterion — so your VPAT reflects reality and survives scrutiny. Start at eaa-navigator.com/vpat.
